originate from a variety of geographic and cultural contexts, focusing on topics such as nationalism and hard rock in Russia, fan culture in Argentina, and punk and Islam in Indonesia. Chapters engage with the central issue of how global music meets local audiences and practices, and considers how fans as well as religious groups react to the uses of religion in popular music. It also looks at how they make these interactions between popular music and religion components in their own identity, community and practice. Tapping into a vital and lively topic of teaching, research and wider cultural interest, and employing diverse methodologies across musicians, fans and religious groups, this book is an important contribution to the growing field of religion and popular music studies.
