Introduction to SAP

ABAP on HANA. We

have heard enough

about SAP HANA, in-

this article, we do

not want to beat

around the

theories. As an

ABAP developer,

we would like to

The whole idea of

the modern

ABAP/SQL/HANA is

to push down logic

to the database.

We outsource

these powerful

innovations to put

database. But do remember, SAP also wants to be as Open as possible.

So given a choice between database specific and database independent solution, always chose the latter (database independent).

major part in doing
this. Like any SQL

Both CDS and AMDP fall in Top-Down Approach of HANA, which are recommended by SAP. We need to be in ABAP system which is on release 7.4 SP05 and higher and HANA is the primary database. By now you have guessed correctly, AMDP

But AMDP is
conceptually
designed to work in
