Accounting Exercises: Teach-yourself accounting exercises

SOLUTIONS: a) and b): To get the answer for a) above, we simply use the basic accounting equation. $ASSETS = OWNER'S EQUITY + LIABILITIES$ If we turn this around to make owner's equity the subject, then: $OWNER'S EQUITY = ASSETS - LIABILITIES$ So we take the assets and minus the liabilities. In other words, $\$760,000 - \$240,000 = \$520,000$

Basic Accounting Exercises Solutions

Note that in most accounting questions you won't have to account for "Cash on hand" and "Bank" in separate accounts. In most questions I just combine these into "Bank." But in this question they specifically talk about opening the bank account with \$20,000 of the \$100,000, which indicates they kept cash on hand in addition to the bank account, which needs to be accounted for.

Journal Entries and Ledger Question and Answer

Show that the accounting equation is satisfied after taking into consideration each of the following transactions in the books of Mr. N . Accounting Cycle Exercises I - Kenyatta University Library

Accounting is based on the principle of two-sided. In order to carry out business activities, the company needs funds; these funds must be given to the company by someone. The funds owned by the company are called assets. Part of these assets is provided by the owner, total amount of funds contributed by him is called owner's equity or capital. If the owner is the only one who contributed ...
