five causes of cancer death. Still it remains the number one killer of adult males in Japan and Korea. Whether the reduced incidence in western societies is a result of dietary changes or methods of food preservation, or some other reason, is as yet uncertain. Improvements in outcome have been reported from mass screening and early detection; more refined techniques of establishing early diagnosis, tumor type, and tumor extent; more radical surgical resection; and resection at earlier stages of disease.

Advances in Surgical

**Pathology: Gastric Cancer** provides a concise, updated review of the pathological characteristics of gastric cancer, with an emphasis on exploring practical issues and recent developments. The book features current and emerging concepts in the field of gastric cancer, a disease whose management requires a multidisciplinary approach in which pathology plays a key role. Its six sections cover the essential histopathology of gastric cancer as well as related topics such as imaging evaluation, molecular diagnosis, and personalized treatment, among other areas of interest. Individual

Chapters written by international experts in the fields of pathology, gastrointestinal medical oncology, cancer epidemiology, and gastrointestinal radiology, address the fundamental issues surrounding gastric cancer, including its epidemiology, basic diagnostic features, differential diagnoses, pitfalls and complications, and treatments. Endoscopic evaluation and histology correlation are emphasized. The screening, clinical management, and treatment of gastric cancer are summarized in related book sections. Recent findings

# Download File PDF Gastric Cancer Gastric

regarding the roles of immunohistochemistry and molecular testing in the diagnosis, prognosis, and personalized treatment of gastric cancer are also reviewed. The book also includes current knowledge regarding the molecular alteration of gastric cancer carcinogenesis and its impact on patient care.

A must-have reference, this new edition provides practical information on treatment guidelines, details of diagnosis and therapy, and personal recommendations on patient management from experts in the field. Consistently

Formatted chapters allow for a user-friendly presentation for quick access of key information by the practicing clinician. Completely updated, this new edition includes all of the latest developments in treatment strategies of medical, surgical and radiation oncologists.

Although there has been a slow but steady decrease in incidence, gastric cancer remains the second leading cause of cancer death worldwide. Several aspects of the oncological and surgical management are still controversial and so gastric cancer represents a

# Download File PDF Gastric Cancer Gastric

challenge for the surgeon. This book aims to delineate the state of the art in the surgical and oncological treatment of gastric cancer, describing the new TNM staging system, the extent of visceral resection and lymphadenectomy focusing on the different open and minimally invasive surgical techniques and discussing intraoperative chemohyperthermia and neoadjuvant and adjuvant treatment. Operative endoscopy and endoscopic ultrasonography are also discussed, as these now have an important role in both diagnostic work-up and palliative care of gastric
