The new growth in hair loss research | Life and style ...

In a second session we generally, but not always, transplant fewer numbers of grafts. If the old scar is incorporated into the new incision, then there will be slightly less hairs per graft since the density in and around the scar will be slightly altered. For those who are bald, the second hair restoration is sometimes less dramatic than the first since the second is used for fine tuning rather than taking the person from completely bald to having hair.

Difference Between 1st and 2nd Hair Transplant?

You need to wait at least 10 months to determine if a second hair transplantation is needed. Because you and your surgeon should first see and evaluate the final result of the first hair transplantation.
