The 23rd Annual International Conference on Information Security and Cryptology, is now open! We welcome authors to submit their research papers on a wide range of information security and cryptology topics.

~~ICISC 2020 : The 23rd Annual International Conference on ...~~

Introduction. This book constitutes revised selected papers from the 22nd International Conference on Information Security and Cryptology, ICISC 2019, held in Seoul, South Korea, in December 2019. The total of 18 papers presented in this volume were carefully reviewed and selected from 43 submissions. The papers were organized in topical sections named:

This book constitutes the thoroughly refereed conference proceedings of the 14th International Conference on Information Security and Cryptology, held in Seoul, Korea, in November/December 2011. The 32 revised full papers presented were carefully selected from 126 submissions during two rounds of reviewing.

This book constitutes selected papers from the 23rd International Conference on Information Security and Cryptology, ICISC 2020, held in Seoul, South Korea, in December 2020. Due to the COVID-19, the confere was held online. The total of 15 papers presented in this volume were carefully reviewed and selected from 51 submissions. The aim of this conference was to provide an international forum for the latest results of research, development, and applications within the field of information security and cryptology.

This book constitutes the thoroughly refereed post-conference proceedings of the 16th International Conference on Information Security and Cryptology, ICISC 2013, held in Seoul, Korea in November 2013. The 31 revised full papers presented together with 2 invited talks were carefully selected from 126 submissions during two rounds of reviewing. The papers provide the latest results in research, development and applications in the field of information security and cryptology. They are organized in topical sections on secure multiparty computation, proxy re-encryption, side channel analysis and its countermeasures, cryptanalysis, embedded system security and its implementation, primitives for cryptography, digital signature, security protocol, cyber security, and public key cryptography.

This book constitutes revised selected papers from the 20th International Conference on Information Security and Cryptology, ICISC 2017, held in Seoul, South Korea, in November/December 2017. The total of 20 papers presented in this volume were carefully reviewed and selected from 70 submissions. The papers were organized in topical sections named: symmetric key encryption; homomorphic encryption, side channel analysis and implementation; broadcast encryption; elliptic curve; signature and protocol; and network and system security.

This book constitutes revised selected papers from the 19th International Conference on Information Security and Cryptology, ICISC 2016, held in Seoul, South Korea, in November/December 2016. The 18 full papers presented in this volume were carefully reviewed and selected from 69 submissions. There were organized in topical sections named: protocols; lattice cryptography; encryption; implementation and algorithms; signatures and protocol; and analysis.

This book constitutes revised selected papers from the 21st International Conference on Information Security and Cryptology, ICISC 2018, held in Seoul, South Korea, in November 2018. The total of 21 papers presented in this volume were carefully reviewed and selected from 49 submissions. The papers were organized in topical sections named: public-key encryption and implementation; homomorphic encryption; secure multiparty computation; post-quantum cryptography; secret sharing and searchable encryption; storage security and information retrieval; and attacks and software security.

This book constitutes the thoroughly refereed post-proceedings of the 6th International Conference on Information Security and Cryptology, ICISC 2003, held in Seoul, Korea, in November 2003. The 32 revised full papers presented together with an invited paper were carefully selected from 163 submissions during two rounds of reviewing and improvement. The papers are organized in topical sections on digital signatures, primitives, fast implementations, computer security and mobile security, voting and auction protocols, watermarking, authentication and threshold protocols, and block ciphers and stream ciphers.

I would like to welcome all the participants to the 3rd International Conference on Information Security and Cryptology (ICISC 2000). It is sponsored by the Korea Institute of Information Security and Cryptology (KIISC) and is being held at Dongguk University in Seoul, Korea from December 8 to 9, 2000. This conference aims at providing a forum for the presentation of new results in research, development, and application in information security and cryptology. This is also intended to be a place where research information can be exchanged. The Call for Papers brought 56 papers from 15 countries and 20 papers will be presented in ve sessions. As was the case last year the review process was totally blind and the anonymity of each submission was maintained. The 22 TPC members nally selected 20 top-quality papers for presentation at ICISC 2000. I am very grateful to the TPC members who devoted much e ort and time to reading and selecting the papers. We also thank the experts who assisted the TPC in evaluating various papers and apologize for not including their names here. Moreover, I would like to thank all the authors who submitted papers to ICISC 2000 and the authors of accepted papers for their preparation of came- ready manuscripts. Last but not least, I thank my student, Joonsuk Yu, who helped me during the whole process of preparation for the conference. I look forward to your participation and hope you will nd ICISC 2000 a truly rewarding experience.

This book constitutes the thoroughly refereed post-conference proceedings of the 15th

International Conference on Information Security and Cryptology, ICISC 2012, held in Seoul, Korea, in November 2012. The 32 revised full papers presented together with 3 invited talks were carefully selected from 120 submissions during two rounds of reviewing. The papers provide the latest results in research, development, and applications in the field of information security and cryptology. They are organized in topical sections on attack and defense, software and Web security, cryptanalysis, cryptographic protocol, identity-based encryption, efficient implementation, cloud computing security, side channel analysis, digital signature, and privacy enhancement.

This book constitutes the thoroughly refereed conference proceedings of the 14th International Conference on Information Security and Cryptology, held in Seoul, Korea, in November/December 2011. The 32 revised full papers presented were carefully selected from 126 submissions during two rounds of reviewing. The conference provides a forum for the presentation of new results in research, development, and applications in the field of information security and cryptology. The papers are organized in topical sections on hash function, side channel analysis, public key cryptography, network and mobile security, digital signature, cryptanalysis, efficient implementation, cryptographic application, and cryptographic protocol.

The 8th International Conference on Information Security and Cryptology was organized by the Korea Institute of Information Security and Cryptology (KIISC) and sponsored by the Ministry of Information and Communication of Korea (MIC).
