Be consistent when drafting. For example, don't use "any" and "all" interchangeably if you intend those words to have the same effect.

This is the third edition of the widely acclaimed and successful casebook on contract in the *Ius Commune* series, developed to be used throughout Europe and beyond by anyone who teaches, learns or practises law with a comparative or European perspective. The book contains leading cases, legislation and other materials from English, French and German law as the main representatives of the legal traditions within Europe, as well as EU legislation and case law and extracts from the Principles of European Contract Law. Comparisons are also made to other international restatements such as the Vienna Sales Convention, the UNIDROIT Principles of International Commercial Contracts, the Draft Common Frame of Reference and so on. Materials are chosen and ordered so as to foster comparative study, complemented with annotations and comparative overviews prepared by a multinational team. The third edition includes many new developments at the EU level (including the ill-fated proposal for a Common European Sales Law and further developments linked to the digital single market) and in national laws, in particular the major reform of the French Code civil in 2016 and 2018, the UK's Consumer Rights Act 2015 and new cases. Legal thinkers typically justify contract law on the basis of economics or promissory morality. But Peter Benson takes another approach. He argues that contract is best explained as a transfer of rights governed by a conception of justice. The result is a comprehensive theory of contract law congruent with Rawlsian liberalism.

This volume tests the claim that, as combinations of Civil and Common Law influences, the mixed systems of contract law in Scotland and South Africa have anticipated the content of the Principles of European Contract Law (PECL) concluded and published in 2003 by the unofficial Commission on European Contract Law. Going further, it rigorously explores what the implications of a Europe-wide contract law would be. The current official moves towards a European contract law within the European Union make the critiques of PECL in this volume especially urgent and significant. With a European contract law nearer to reality than ever before, mere policy critiques are no longer enough. This book provides the essential technical and substantive assessments of PECL from the perspective of Scots and South African contract lawyers, and is offered to the European debate without prejudice as to the deeper policy questions. At the same time, this volume will inform Scots and South African lawyers about the substance of international developments in the field, and suggest ways to develop their still vigorous and vital national laws to remain in step with the needs of the present day.

"Imaginary Bodies is a collection of essays that offer a sustained challenge to traditional philosophical notions of the body, sex and gender. Moira Gatens explores alternative positions to dualism by exploring psychoanalytic, Foucaultian and Spinozist notions of embodiment. The book traces a largely neglected genealogy of philosophers from Spinoza,

Nietzsche, Freud, Foucault and Deleuze and sets this tradition against that of the Enlightenment. What emerges are new ways of thinking those aspects of life which Gatens calls "imaginary." Confining herself to neither philosophy of "the subject" nor an ahistorical philosophy of "the body" at the expense of broader ethical and socio-political issues, Gatens shows the many connections between theories of bodies politic and the (sexed) individual. She compellingly, lucidly, and trenchantly engages with the ethical, legal and sexual relations between men and women which are placed in its proper historical and political context." <http://www.loc.gov/catdir/enhancements/fy0648/95006521-d.html>.
