The Laguna has been reliable and very comfortable. The performance is good and the Diesel engine makes like of hills and is very quiet. Much superior to some petrol cars that I have driven during the same period. It is sad that Renault has discontinued the Laguna as it will be difficult going to another make for a replacement. Understanding Global Environmental Politics develops a new, critical approach to global environmental politics. It argues that the major power structures of world politics are deeply problematic in ecological terms, and that they cannot be easily used to resolve major environmental challenges such as global warming. Instead of simply advocating the construction of new international institutions to respond to such challenges, therefore, the book argues that the construction of alternative social and political structures is necessary.

Dorothy Jensen tells the story of her humble beginnings as Dorothy Zimmerman in Wichita Falls, Texas, where she grew up with her mother Pearl, her sister Lavona, and her brother Leo. After high school, she worked at Perkins-Timberlake Department store in the credit department. One year, she and a co-worker took a trip together to Pike's Peak. That is when Dorothy realized how much she loved travel. In 1946, when another friend asked her to move out to San Diego, she packed her bags. That is where she met Ib Jensen. They married and she became the mother of three sons who filled her days while they traveled during Ib's military career, living in Guantanamo Bay and Okinawa, and several places in the United States. Dorothy and Ib continued to travel for pleasure to Denmark, Germany, Spain, and places far from those humble beginnings in Wichita Falls. Dorothy wrote this book at the request of her son Robert so he could share it with his children. She began the project by writing fifty-three pages and then incorporated that with several travel journals she kept over the years. Dorothy also has hundreds of slides to go along with these memories.
