As a new nurse you're entering one of the most challenging and rewarding fields. You will quickly learn how to navigate a complex medical landscape, care for sick and vulnerable patients, and manage stressful situations with skill and ease. This book will be your reassuring guide through all this and more. “ Among all the recent books on medicine, Critical Care stands alone. “ — Pauline Chen, author of Final Exam “ A must read for anyone who wants to understand healthcare. Extraordinary. ” — Elizabeth Cohen, MPH, CNN Senior Medical Correspondent Critical Care is the powerful and absorbing memoir of Theresa Brown—a regular contributor to the New York Times blog “ Well ” —about her experiences during the first year on the job as an oncology nurse; in the process, Brown sheds brilliant light on issues of mortality and meaning in our lives.

A book of affirmations with narratives, stories and journal prompts to help the new nurse get through the common challenges they experience in their first few years as a nurse. Each gentle affirmation will shake the reader's limiting beliefs around their ability as a new nurse while helping them untether from the fear, anxiety and feelings of overwhelm they commonly experience.

This collection of true narratives reflects the dynamism and diversity of nurses, who provide the first vital line of patient care. Here, nurses remember their first “ sticks,” first births, and first deaths, and reflect on what gets them through long, demanding shifts, and keeps them in the profession. The stories reveal many voices from nurses at different stages of their careers: One nurse-in-training longs to be trusted with more “ important ” procedures, while another questions her ability to care for nursing home residents. An efficient young emergency room nurse finds his life and career irrevocably changed by a car accident. A nurse practitioner wonders whether she has violated professional boundaries in her care for a homeless man with AIDS, and a home care case manager is the sole attendee at a funeral for one of her patients. What connects these stories is the passion and strength of the writers, who struggle against burnout and bureaucracy to serve their patients with skill, empathy, and strength.

Do no harm. Take no sh*t.

"When a cancer nurse becomes a cancer patient, she has to confront the most critical, terrified, sometimes furious patient she's ever encountered: herself. A frank look at struggling with illness while navigating the health care maze"--

As a new nurse you're entering one of the most challenging and rewarding fields. You will quickly learn how to navigate a complex medical landscape, care for sick and vulnerable patients, and manage stressful situations with skill and ease. This book will be your reassuring guide through all this and more. Practicing nurse and New York Times columnist Theresa Brown invites us to experience not just a day in the life of a nurse but all the life that happens in just one day on a busy teaching hospital 's cancer ward. In the span of twelve hours, lives can be lost, life-altering treatment decisions made, and dreams fulfilled or irrevocably stolen. Unfolding in real time--under the watchful eyes of this dedicated professional and insightful chronicler of events--The Shift gives an unprecedented view into the individual struggles as well as the larger truths about medicine in this country. By shift 's end, we have witnessed something profound about hope and humanity.

A New York Times bestseller. " A funny, intimate, and often jaw-dropping account of life behind the scenes. " —People Nurses is the compelling story of the year in the life of four nurses, and the drama, unsung heroism, and unique sisterhood of nursing—one of the world 's most important professions (nurses save lives every day), and one of the world 's most dangerous, filled with violence, trauma, and PTSD. In following four nurses, Alexandra Robbins creates sympathetic characters while diving deep into their world of controlled chaos. It 's a world of hazing— " nurses eat their young. " Sex—not exactly like on TV, but surprising just the same. Drug abuse—disproportionately a problem among the best and the brightest, and a constant temptation. And bullying—by peers, by patients, by hospital bureaucrats, and especially by doctors, an epidemic described as lurking in the " shadowy, dark corners of our profession. " The result is a page-turning, shocking look at our health-care system.
